3.3 (e) (1) (iii)

SHELTERED HOUSING FACILITIES.

3.3(e) Surfaces. (1) The following areas in sheltered housing facilities must be impervious to moisture: (iii) All walls, boxes, houses, dens, and other surfaces in contact with the animals.

The lower outside back walls of the enclosures of the adult building have an area where the wall coating has been scratched and worn away. This has resulted in areas of exposed wood.

Exposed raw wood is not impervious to moisture. Surface that the dogs come into contact with that are not impervious to moisture are not able to be effectively cleaned and sanitized. This can expose the dogs to disease hazards and it will affect their health and well-being.

Licensee must repair, replace or resurface the affected areas.

2.132 (d)

PROCUREMENT OF DOGS, CATS, AND OTHER ANIMALS; DEALERS.

2.132(d) No dealer or exhibitor shall knowingly obtain any dog from any person who is required to be licensed but who does not hold a current, valid, and unsuspended license. No dealer or exhibitor shall knowingly obtain any dog from any person who is not licensed, without obtaining a certification that the animals were born and raised on that person's premises and, that the person does not maintain more than three breeding female dogs.

Licensee accepted for auction nine females (#71, #204, #221, #226, #227, #235, #266, #267, #268) and one male (#50) from an unlicensed source. Also accepted for auction eight females (#68, #69, #70, #203, #224, #225, #264, #265) and one male (#250) from another unlicensed source. Both unlicensed sources signed the consignment form stating that they are exempt from licensing. Many of the listed females had descriptions that include "pups weaned on ...", "may be bred", "excellent mother has had 2 litters", "will be in heat soon" and "has big litters".

Regulation requires that owners of an auction may only procure random source dogs from licensed sources unless the consignors are exempt from USDA licensing. It is inconceivable that the Licensee did not realize that accepting an exemption from consignors alleging exempt status for greater than 4 breeding females is acceptable.

Licensee must only consign dogs that come from USDA licensed facilities or those exempt from licensing. Accepting dogs from unlicensed facilities just because they signed the exemption clause does not relieve the Licensee from responsibility. Consigning dogs from an unlicensed source inhibits the ability to effectively perform tracebacks in the event of disease outbreak and to be sure that the animals were acquired legally.

Inspection Report

cleaning underneath and around the supplies. All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage.

Upon arrival Friday evening it was observed that there was an open bag of food with the top rolled down sitting near the door of the first trailer. On Saturday morning that same bag was present and there was an additional opened bag in the third trailer. All dogs had food in their enclosures.

Improperly stored feed is at risk of contamination, spoilage and vermin infestation. This can expose the dogs to risk of disease hazards and can affect their health, comfort and well-being.

Licensee must properly store opened bags of feed in a leakproof container with a tight fitting lid.

Correct by: FROM THIS TIME FORWARD

3.11 (b) (1) REPEAT
CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

3.11(b) Sanitization of primary enclosures and food and water receptacles. (1) Used primary enclosures and food and water receptacles must be cleaned and sanitized in accordance with this section before they can be used to house, feed, or water another dog.

Many of the enclosures had dry and crusted feces on the bottoms and sides. It was first observed in empty kennels on Friday evening. Upon return on Saturday morning the same feces was observed but the enclosures had dogs in them. Many of the water and food bowls were observed to be dirty on Friday evening. This inspector observed the Licensees employees filling the dirty water bowls and placing them back into the enclosures. Some of the enclosures had dogs in them on Friday but most arrived on Saturday morning. On Saturday it was observed by this inspector that the employees were adding food to dirty food bowls.

The food and water bowls and the enclosures must be cleaned and sanitized between auctions to reduce the risk of disease hazards. This is for the health and well-being of the dogs.

Licensee must thoroughly clean all hard surfaces accessible to the dogs with approved detergents. This must be followed by a thorough sanitization then clean water rinse to remove residue. This must be done prior to each auction.

2.4

NON-INTERFERENCE WITH APHIS OFFICIALS.

A licensee or applicant for an initial license shall not interfere with, threaten, abuse (including verbally abuse), or harass any APHIS official in the course of carrying out his or her duties.

On Saturday November 21, 2009 at approximately 2:45pm Harold Neuhart approached the USDA inspectors and began verbally assaulting ACI Jan Feldman and myself. This was done in front of a crowd which moments later incited another attendee to verbally assault this inspector.

At the conclusion of the inspection Harold again verbally assaulted the inspectors with the intent to intimidate.

Yelling at and verbally abusing APHIS officials in a harassing and threatening manner is considered interference with the inspection process. This undermines the authority of the inspector to the Licensees that were present and our ability to function effectively at subsequent dog auctions.

This type of behavior will not be tolerated.

On-site inspection conducted by Tracy Gavidia, ACI and Jan Feldman, ACI

2.4

NON-INTERFERENCE WITH APHIS OFFICIALS.

A licensee or applicant for an initial license shall not interfere with, threaten, abuse (including verbally abuse), or harass any APHIS official in the course of carrying out his or her duties.

On Saturday November 21, 2009 at approximately 2:45pm Harold Neuhart approached the USDA inspectors and began verbally assaulting Jan Feldman and this inspector. This was done in front of a crowd.

At the conclusion of the inspection, when this inspector attempted to have a conversation with Mr. Neuhart, he again verbally assaulted the inspectors with the intent to intimidate.

Yelling at and verbally abusing APHIS officials in a harassing and threatening manner is considered interference with the inspection process. This undermines the authority of the inspector to the licensees that are present, potentially incites others present to conduct themselves similarly, and potentially affects the ability of the inspector to function effectively at subsequent dog auctions.

This type of behavior will not be tolerated. Correct immediately.
